

White Kidney Bean	85085-22-9		White Kidney Bean can interrupt the digestive process that converts starch to sugar, thus lessen the caloric intake from foods such as bread and rice. By reducing the absorption of these sugars, the body has fewer calories to store as fat. White Kidney Bean can be a very effective supplement for dieters and those interested in maintaining a healthy build.
Xenical	96829-58-2	≥99% by HPLC	Xenical is a drug designed to treat obesity. Its primary function is preventing the absorption of fats from the human diet, thereby reducing caloric intake. It is intended for use in conjunction with a physician-supervised reduced-calorie diet. Xenical is the saturated derivative of lipstatin — a potent natural inhibitor of pancreatic lipases isolated from the bacterium <i>Streptomyces toxytricini</i> . Xenical works by inhibiting pancreatic lipase, an enzyme that breaks down triglycerides in the intestine. Without this enzyme, triglycerides from the diet are prevented from being hydrolyzed into absorbable free fatty acids and are excreted undigested.
